

Section 9: Client side identity with NextAuth (AuthJS)

0 / 11 | 1hr 33min

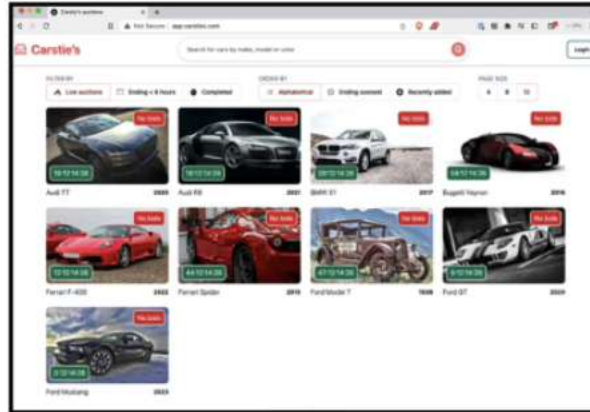

- ☐ 104. Introduction to Section 9
 3min
- ☐ 105. Before we begin
 5min
- ☐ 106. Installing Next Auth into our client app
 12min
- ☐ 107. Adding the login functionality
 6min
- ☐ 108. Getting the session details in the client
 13min
- ☐ 109. Populating the session data
 11min
- ☐ 110. Populating the User actions dropdown
 9min
- ☐ 111. Protecting routes
 9min
- ☐ 112. Testing API authentication
 8min
- ☐ 113. Getting the access token to use to authenticate to our resource server
 11min
- ☐ 114. Summary of Section 9
 6min

In this section

- Adding authentication to the client app
- NextAuth (soon to become Auth.js)

Is what we are doing 'secure'

Token is encrypted using NEXTAUTH_SECRET

Token is an HTTP only cookie - cannot be accessed by JS

Whatabout...

Refresh tokens

Forgot password functionality

Email confirmation

Consent

2 Factor authentication

Etc...
