

## Section 5: Identity Server

0 / 14 | 2hr

- ☐ 48. Introduction to Section 5
  - 8min
- ☐ 49. OAuth and OpenIDConnect
  - 10min
- ☐ 50. Creating the Identity Server project
  - 5min
- ☐ 51. Reviewing and configuring our new project
  - 13min
- ☐ 52. Seeding data and adding a migration
  - 17min
- ☐ 53. Reviewing the login page in identity server
  - 6min
- ☐ 54. Adding a register page
  - 8min
- ☐ 55. Adding a register page part 2
  - 8min
- ☐ 56. Adding a register page part 3
  - 9min
- ☐ 57. Adding client credentials to allow clients to request a token
  - 13min
- ☐ 58. Adding a custom profile service to identity server
  - 6min
- ☐ 59. Configuring auth on the resource server
  - 7min
- ☐ 60. Configuring the auth endpoints on the resource server
  - 8min
- ☐ 61. Summary of section 5
  - 3min

# In this section

---

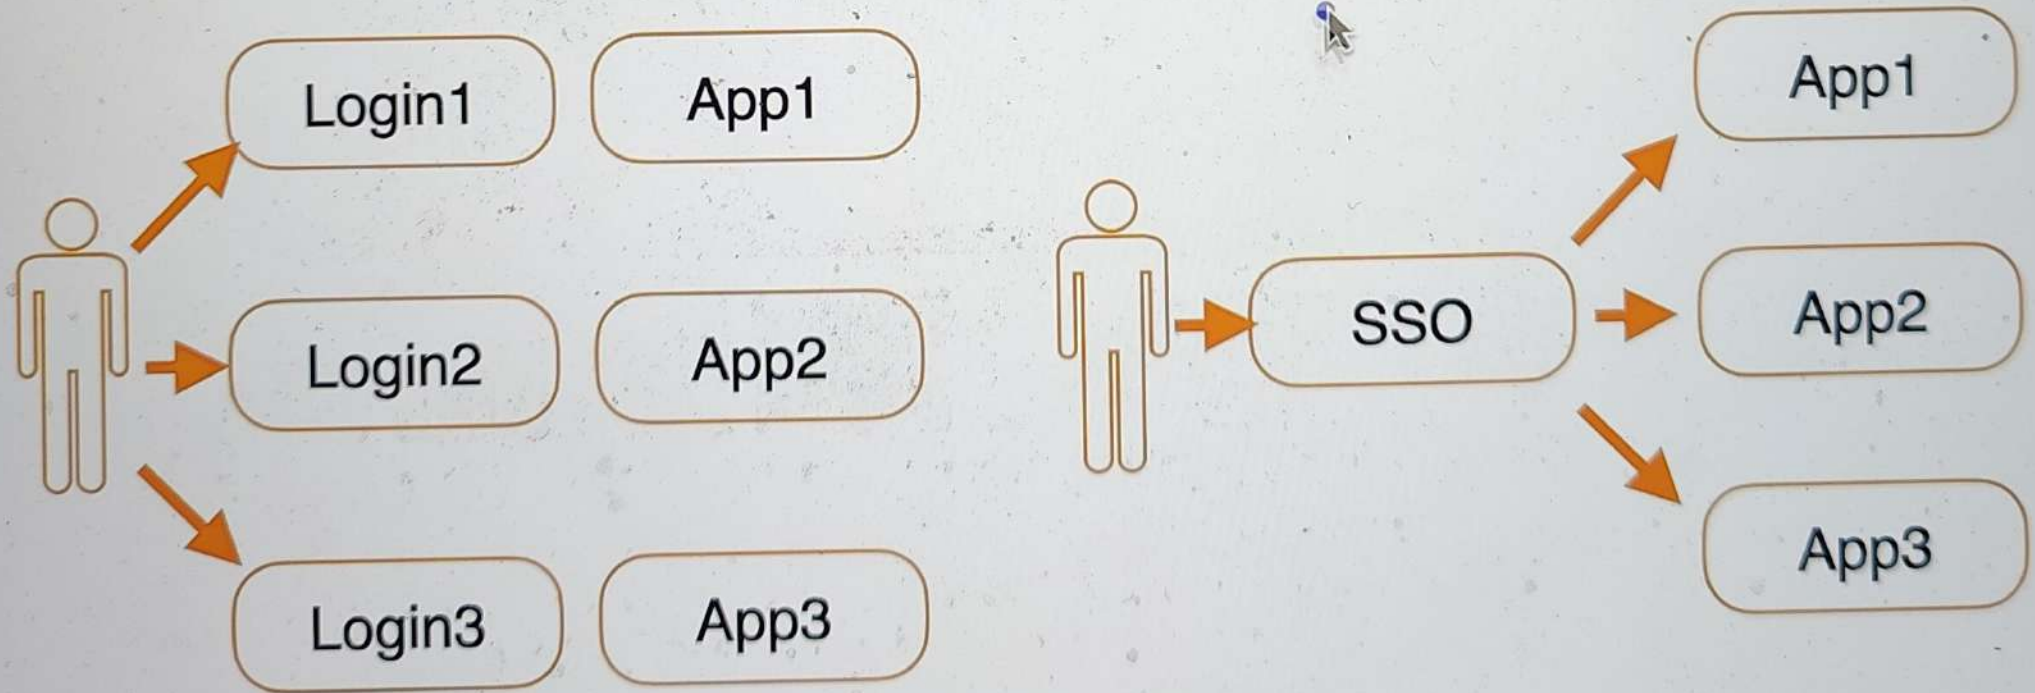

- Creating an IdentityServer project
- Customising IdentityServer for our needs
- Adding authentication to our API endpoints
- OpenID Connect and OAuth 2.0

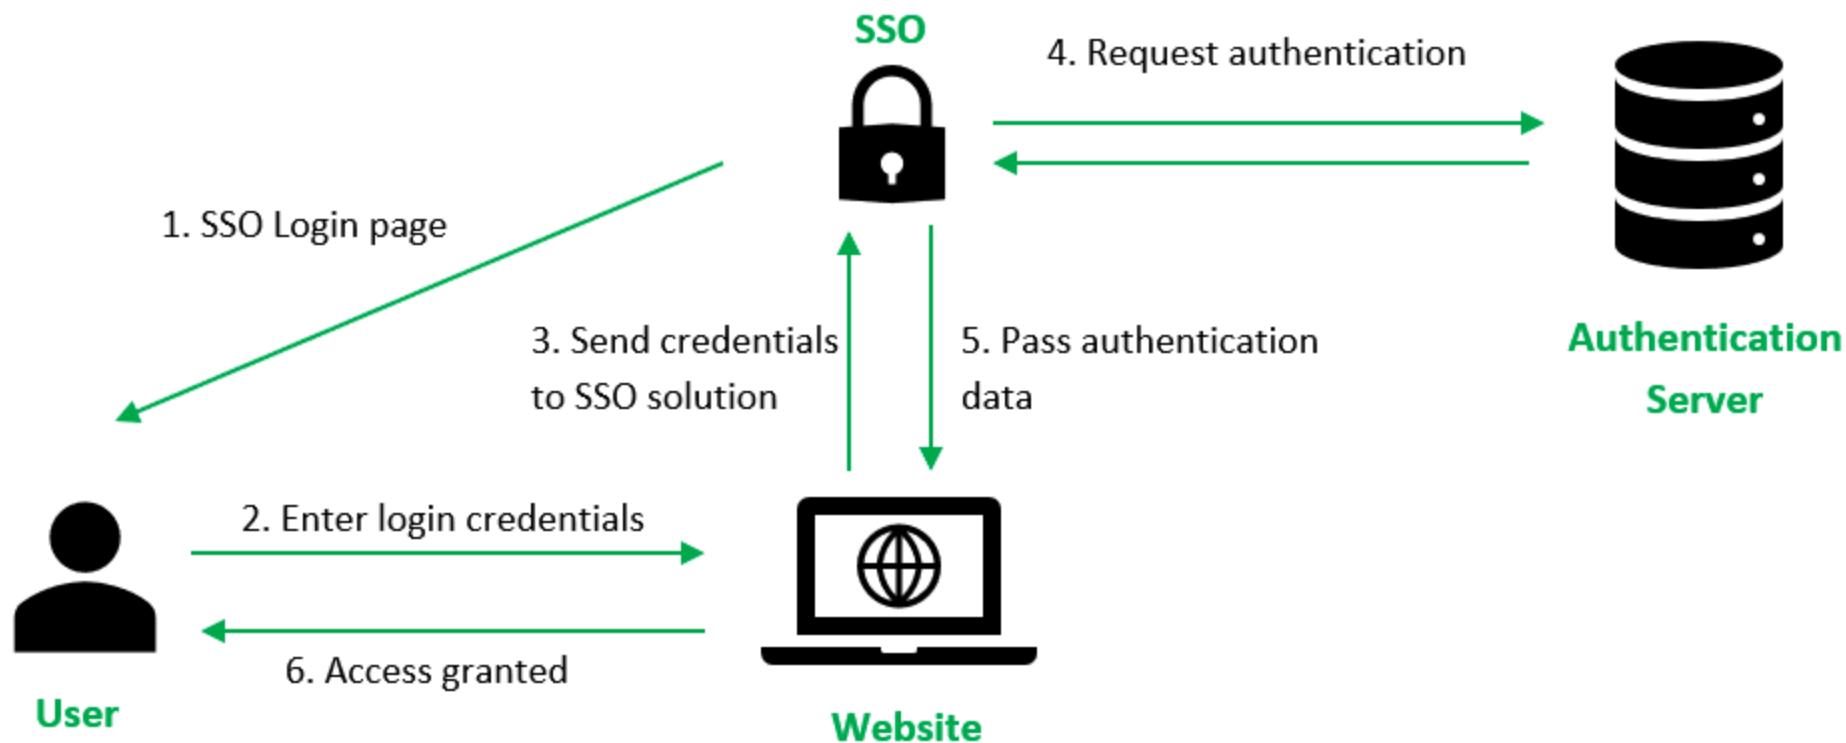

# What is IdentityServer?

---

- Authentication Server
- Implements OpenID Connect (OIDC) and OAuth 2.0
- Designed to be a customisable solution.
- No longer open source (licence required in prod)
- Single Sign On solution

# Single Sign On (SSO)

# How does Single Sign-On (SSO) Works
