  - ▶ 7min
- [ ] 122. Creating a reusable date input
  - ▶ 9min
- [ ] 123. Creating a fetch wrapper
  - ▶ 14min
- [ ] 124. Adding the create auction server action
  - ▶ 10min
- [ ] 125. Adding react hot toast to display notifications if something goes wrong
  - ▶ 5min
- [ ] 126. Adding the auction details page content
  - ▶ 9min
- [ ] 127. Adding the edit auction page
  - ▶ 14min
- [ ] 128. Adding the delete auction functionality
  - ▶ 9min
- [ ] 129. Summary of section 10
  - ▶ 4min

In this section

- Building the rest of the functionality

- React hook form

- Routing in NextJS

- "Error handling"

So, how do I add image upload functionality then?

Image service?

AuctionID
Seller of auction
Authentication

Auction Service
